## Step 1

To make a one-sided tessellation, start at one corner of the sticky note and draw a line to an adjacent corner. The line can be curvaceous, geometric, or both.

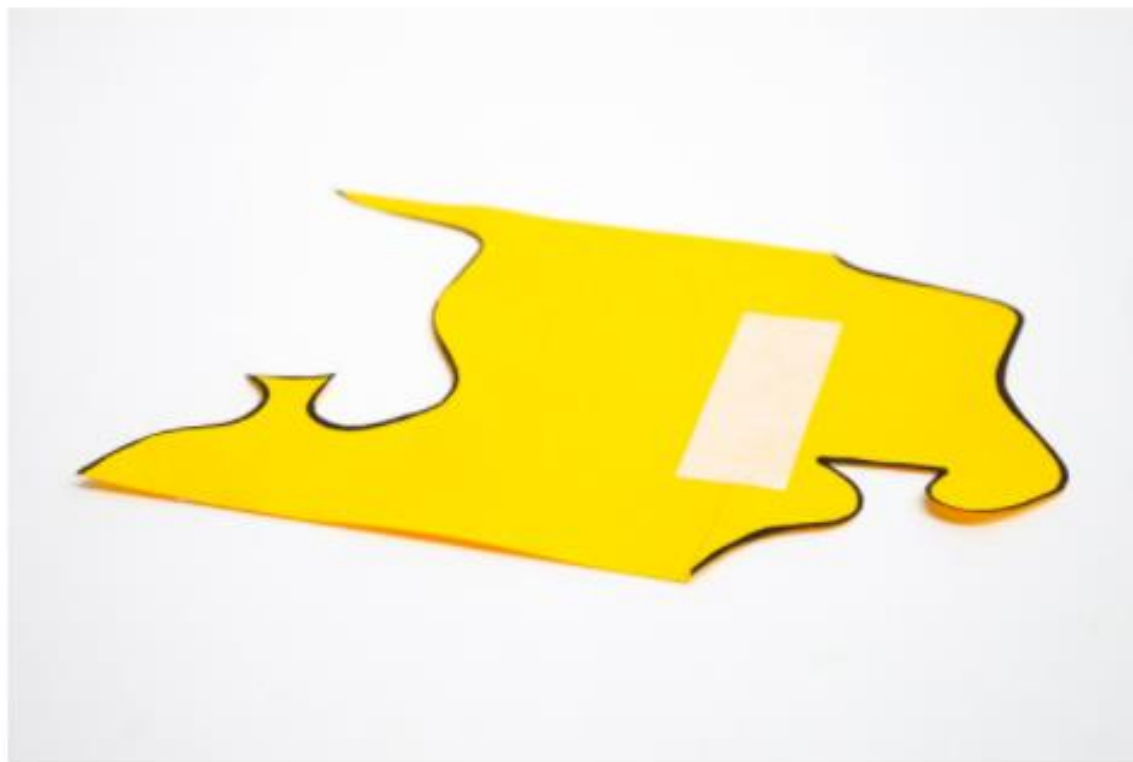

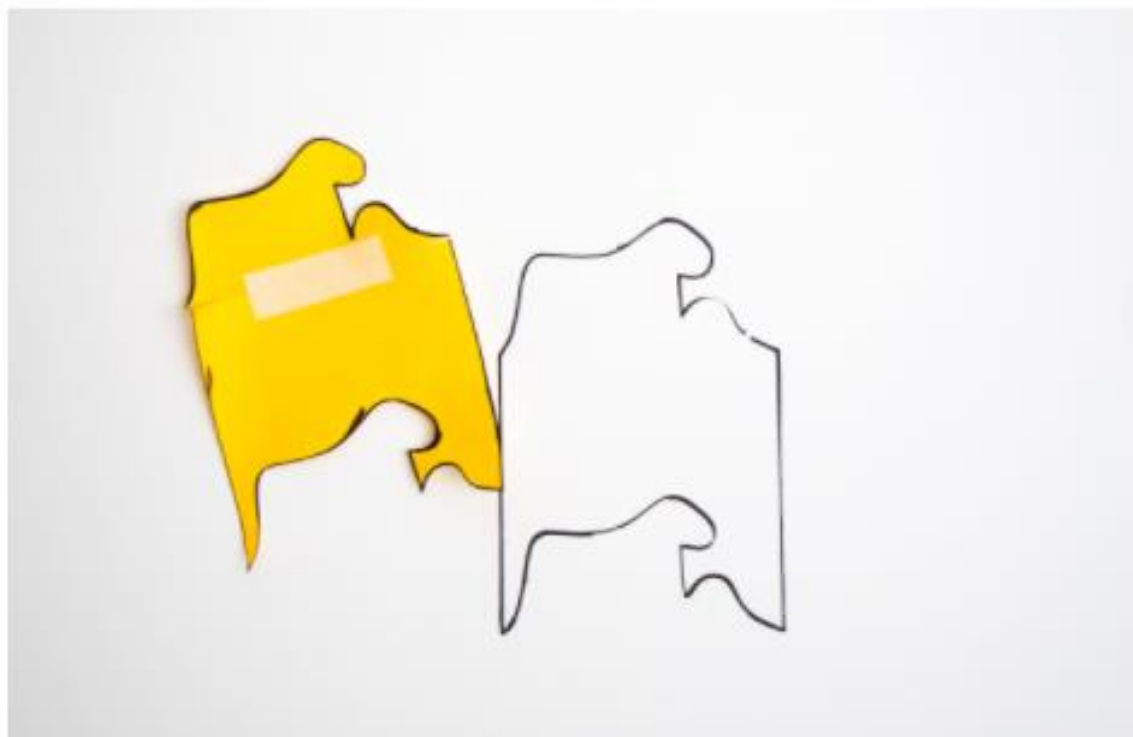

Step 2

Cut on the line.

Take the piece you just cut and move it to the opposite side of the sticky note. Then, tape it to the rest of the sticky note. This will be the template for your tessellation.

Using your template and a marker, trace it in the center of a large piece of paper.

Step 5

Continue tracing the template so that the shapes on your paper fit together. This is a tessellation!

Step 6

When you have filled your paper with tessellated shapes, color them in!
